

Accu-Tab® Series 100

Calcium Hypochlorite Chlorinator

Small Investment. Big Benefits.

Engineered specifically for HOA, Hotel, and Motel applications, the Accu-Tab® Series 100 chlorination system is an affordable option for consistent chlorine delivery. This unit is an ideal replacement for Trichlor systems where over stabilization can lead to a significant decrease in chlorine effectiveness and potential pool shutdown. Avoid this risk with the cyanuric acid-free Accu-Tab system for consistent, proven performance.

Model Series 100

- Engineered for *
- Indoor pools up to 80,000 gallons
 - Outdoor un-stabilized pools up to 30,000 gallons
 - Outdoor stabilized pools up to 60,000 gallons
 - NSF 50 certified delivery — 0.8 lb/hr chlorine
 - Tablet storage — 30 lbs.

Specifications

Chlorinator Size... 14" Diameter x 25"H
(This size does not include the fittings)
Inlet Connection ¾" Socket
Outlet Connection ¾" Socket

*Stabilizer levels assumed to be 15 ppm. Treatable gallons vary depending on factors such as bather load, climate, stabilizer level, etc.

Flexible. Affordable. Reliable.

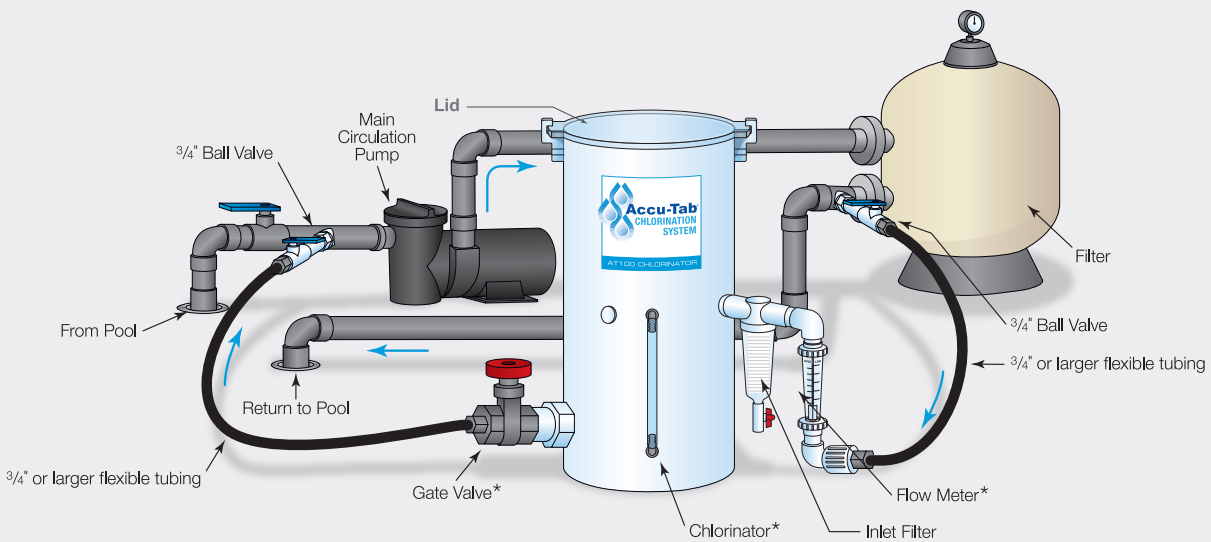

The Accu-Tab® system combines proven erosion feeder technology with proprietary 3 1/8-inch Accu-Tab Blue SI calcium hypochlorite tablets. Together, the system delivers predictable rates of chlorine for commercial pool water applications.

PowerBase Benefits

- Ideal for smaller swimming pools
- Very few moving parts — minimizing maintenance
- No small openings that can clog
- Usually only annual cleaning required
- Delivers predictable rates of chlorine
- Easy to install

Suction Return Installation*

+ Gravity Return and Forced Venturi Return installation options available

* Included with Chlorinator

Accu-Tab Blue SI 3 1/8-inch Tablets

Accu-Tab Blue SI 3 1/8-Inch calcium hypochlorite tablets are specially engineered and independently tested by the labs at NSF International to work in Accu-Tab systems in accordance with NSF/ANSI Standard 50 listed. They contain scale inhibitor for cleaner operation. For safety, the tablets have a blue speckled appearance which differentiates them from incompatible chemicals.
